PROJECTS

TOOLS & TECHNOLOGIES

CLIENTELE

A web application which supports sell process and activation of the products for a telecom company. As a part of OSS, this application is used by client's technical team, which is responsible for finding feasibility and estimation of the products requested by its clients. The application connects to various other applications to collect required data using web APIs.

C#, ASP.NET MVC, Entity Framework, SQL Server.

DON-KICHOT

This is a web application used for payments and maintenance of its statuses. Generating the updates from banks. Presenting the data of payment status to customers. Communicate with other systems to collect the internal data. It supports payment processing, payment bookings, balances and refunds reports.

ASP.NET MVC, ASP.NET core web API, Angular 8, Postman

WORKFLOWCS

WorkflowCS is a document management system and its flow management application. It stores and produces the important document whenever requested. It handles the document flow for any document approval process and it also handles all the billing documents which needs to be sent to client's client. The application connects to many of the subsystems in the organizations, thus making it complex and critical application. I am leading the team of 6 with L2 and L3 support (24/7) for this application.

C#, ASP.NET core, Entity Framework, Oracle 11G, SQL Server, ITIL process.

PARTNER WEB

Client Company is major Austrian mobile network operator. They have various products like mobile telephony, Fixed Line (landline), internet, IT services, IPTV. For selling these products, client has many outlets in the country. These outlets use the Partner Web application for selling the products to customers. Partner Web is a web-based application developed using ASP.NET MVC, SQL Server. Some of the products on which I have worked on: SIP Trunking, IPTV, Postpaid Mobile, Be Free, Third-Party services.

C#, ASP.NET, MVC, Entity Framework, SQL Server

HIGH SPEED ALLOCATION ENGINE

The engine is designed to significantly automate and reduce the end-to-end processing time of movement of collaterals between borrowers and lenders. An algorithm was designed to calculate as many eligibilities and allocation criteria as possible. Client can see the status of their trade requests and is able to send a trade request.

C#, ASP.NET, MVC, SQL Server

BULK SMS SENDING AND MANAGEMENT

A web-based intranet application, which is used by other intranet applications within the organization to send SMS to the customers of HDFC ERGO GIC Ltd. The idea was to keep one centralized log of the outgoing SMS to customers and provide the similar interface to all the intranet applications.

C#, ASP.NET, Web Services, Oracle 10G

EMPLOYEE PORTAL (eStecker)

A Dashboard for the HDFC ERGO General Insurance Company Limited named "eStecker". It is a web-based intranet application. All departments can manage their Information separately and in common as well. It also includes the day-to-day attendance system of the employees. All Employee payroll system is managed in attendance module.

C#, ASP.NET, SQL Server
